CURVED LINES

Unlike most lines (straight, vertical, horizontal or diagonal lines), curved lines can lead the eye around and through the image like a meandering river. Curved lines denote a sense of movement that can seem slower and more restful than with straight lines, even if it is capturing cars moving at night with a slow shutter speed.

INSTRUCTIONS

1. Brainstorm and plan ideas for "ANGLES AND CURVES." Consider various types of containers, backgrounds and lighting that will make your photos most successful.
2. *Take at least 10 photos.....showroom quality (composition terms must be evidents)*
3. Edit your photos on your phone: crop, play with the filters, rotate the image(s)
4. Submit to Canvas
