IMPORTANT FACTS

- 1965 "The Responsive Eye"
- Influenced by Abstract and Expressionist movements by de-emphasizing (or even eliminating) representational subject matter - recognizable
- People ready for new & fun

OP ART

A visual art style that uses precise patterns, mathematics, abstract shapes, non-representational objects and color (or black & white) to create Optical illusions.

INSTRUCTIONS

1. Background: Lightly draw *parallel* lines going across paper. Use both sides of the ruler.
2. Draw a simple object that is round in nature, like a heart or a circle.
3. Draw curved lines from side of the round object to the other to create dimension and movement. (straight → curved → straight)
4. Color in bands, alternating the bands, like the American flag. Only use 2 -3 colors
